MDF MOULDINGS  
BULLNOSE SHELVING

Masisa mouldings offer a range of versatile trim solutions for architectural and interior design projects. They are crafted to enhance spaces with their durable materials and diverse applications.

Whether it's adding a refined edge with bullnose profiles, achieving a smooth and uniform finish with MDF, or ensuring strong, stable connections, these products contribute flexibility, durability, and aesthetic appeal in architectural and interior applications.

# BULLNOSE SHELVING

Masisa's Bullnose tile is a type of tile trim with a semi-rounded finished edge. It is ideal for edges or corners that make the transition from the tile to the wall. Our bullnose tile has a curved edge on the outside, but is flat where it faces the wall or surface for a perfect finish.

## USES OF THE PRODUCTS

Masisa Bullnose Shelving application serves several purposes. It is primarily used for finishing and decorative purposes, providing an aesthetically pleasing transition between different surfaces or covering gaps and joints. Masisa bullnose shelving is often installed along the edges of walls, ceilings, doorways, windows, or cabinetry to add a smooth, rounded finish and to protect the underlying structure.

## PRODUCT ATTRIBUTES

- Reliable supply
- Superior finish
- TSCA certified
- SCS-certified materials
- FSC® certified product

## PRODUCTS

MDP - MDF

## FEATURES

- Blemish and defect free.
- Light weight.
- Customized sizes.

## FINISHES

- Raw
- Jesso
- Pre - finished

## GENERAL SPECIFICATIONS

# MDF MOULDINGS

MDF mouldings are a versatile trim material used in construction and interior design projects. Made from compressed wood fibers, it offers a smooth surface and uniform density.

## USES OF THE PRODUCTS

Masisa MDF mouldings finds widespread application as baseboards, crown mouldings, door and window casings, chair rails, wainscoting, picture rails, panel mouldings, decorative accents, shelving, cabinetry and ceiling beams. It adds a finished look, architectural detail, and decorative accents to walls, ceilings, doors, and furniture. With its ability to be easily painted and customized, MDF moulding provides a solution for enhancing the aesthetic appeal of any space.
